Prepared by the Trade Analysis Branch, Commercial Agriculture Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Joel L. Greene and Lilia E. George. Mrs. George also provides word processing and table formatting support. Editorial support is furnished by Martha R. Evans, Publications Services Branch, Information Services Division, Economic Research Service. Data processing support is provided by Kenneth King, Information Technology Services, Information Services Division.

Digest

Exports a Record \$54.2 Billion in Fiscal 1995 (see page 2)--U.S. agricultural exports reached a record \$54.2 billion in fiscal 1995, surpassing the previous high of \$43.8 billion set in 1981. Exports were almost \$11 billion higher than in fiscal 1994. Bulk exports led the surge, rising 37 percent to \$24.1 billion. Strong U.S. corn, soybean, and cotton exports accounted for nearly half the gain. High-value product (HVP) exports rose 16 percent to a record \$30.1 billion, advancing for the tenth consecutive year.

Final Fiscal 1995 Imports Set Record at \$29.5 Billion (see page 6)--U.S. agricultural imports reached \$29.5 billion in fiscal 1995, 12 percent above fiscal 1994's \$26.4 billion. A few commodities lagged, but most commodities advanced. Coffee, rubber, vegetable oils, live animals, and horticultural products contributed to the record import value. Declines were concentrated in relatively few commodities such as beef, tobacco, seeds, grains, and oilseeds.

Notice

FATUS tables A-2 and B-3 are now available over the CALL-ERS/NASS electronic bulletin board. Set your communications software to 9600 (or lower) baud, N-8-1, and dial 1-800-821-6229 or 1-202-219-0377 to access the bulletin board. Log on as a new user and follow the instructions. The tables are self extracting archives which are decompressed by typing the file name at the command prompt.

Exports a Record \$54.2 Billion in Fiscal 1995

U.S. agricultural exports reached a record \$54.2 billion in fiscal 1995, surpassing the previous high of \$43.8 billion set in 1981. Exports were almost \$11 billion higher than in fiscal 1994. Bulk exports led the surge, rising 37 percent to \$24.1 billion. Strong U.S. corn, soybean, and cotton exports accounted for nearly half the gain. High-value product (HVP) exports rose 16 percent to a record \$30.1 billion, advancing for the tenth consecutive year.

Bulk Exports Rise

The volume of bulk exports rose 39 percent to 128 million tons because of strong shipments of corn and soybeans. Bulk volume was the highest since 1982 when nearly 133 million tons were exported. There were large increases in rice and cotton exports, but they accounted for a much smaller share of bulk export volume.

Corn exports soared 77 percent to 58.6 million tons as shipments took off after China reduced its exports to world markets to an estimated 1.5 million tons. In fiscal 1995, the United States supplied an estimated 83 percent of world corn exports, compared with 59 percent in fiscal 1994 when China exported nearly 12 million tons of corn. Demand for corn was especially strong in Asia, and the United States sent record shipments to Japan, 16.4 million tons; South Korea, 8.9 million tons; Taiwan, 6.2 million tons; China, 4 million tons, and Southeast Asia, 1.5 million tons. Corn exports to Egypt were also a record 2.6 million tons. Shipments to Mexico rose 89 percent to 3.2 million tons because of drought in northern Mexico, and exports to the European Union (EU-15) rose 94 percent to 3.4 million tons because of drought in Spain.

Soybean exports rose 44 percent to 23.6 million tons, the highest since 1983. The United States expanded its soybean shipments, filling gaps left by lower South American exports. Exports to the EU-15 jumped 57 percent to 10.1 million tons. Exports were also strong to Asia, as exports to Japan rose 15 percent to 4.1 million tons. Shipments to both South Korea and Taiwan jumped 52 percent to 1.4 million tons and 2.6 million tons, respectively.

Cotton exports jumped 27 percent to nearly 2 million tons valued at a record \$3.5 billion. Strong

demand in China, which imported cotton to supplement domestic production and meet regional shortages, and reduced global production, raised world cotton prices in 1995. U.S. cotton export prices reached an average of \$1,750 per ton, compared with \$1,460 the previous year. This sharp increase resulted in record cotton export value. Exports to China totaled more than 471,000 tons, the highest shipments since fiscal 1980.

Rice exports rose 55 percent to 3.8 million tons. A large U.S. crop and strong demand for rough rice boosted U.S. exports in 1995. Exports to Latin America rose 156 percent to 1.5 million tons, with the strongest gain to Brazil, where exports increased to 352,000 tons from 29,000 tons the previous year. Exports to the EU-15 rose 39 percent to 448,000 tons, and exports to the Middle East rose 211 percent to more than 1 million tons. The largest gains were to Turkey at 380,000 tons, up from 58,000 tons, and Iran at 241,000 tons, up from 60,000 tons.

HVP Exports Another Record

HVP exports reached a record \$30.1 billion, 16 percent higher than in fiscal 1994. HVP exports were led by increased consumer food products such as red meat, poultry meat, and vegetables. HVP growth was strong because of economic growth in many foreign markets and favorable exchange rates, especially in Japan.

U.S. beef exports rose 19 percent to \$2.6 billion, led by a 26-percent gain to Japan to \$1.6 billion. Exports to South Korea rose 46 percent to \$291 million. Mexico had a substantial decline in beef purchases from the United States in 1995. Mexico's economic crisis resulted in a 33-percent reduction to \$129 million.

Pork exports jumped 55 percent to a record \$812 million, again led by strong gains to Japan. Exports to Japan rose 59 percent to \$552 million because of favorable prices and demand for quality U.S. pork products. Exports to Russia rose 128 percent to \$63 million, making Russia the second largest market for U.S. pork in 1995.

Poultry meat exports increased 33 percent to \$1.9 billion. Russia was again the leading market with exports of \$504 million. Low domestic production and strong demand for low-priced chicken parts boosted U.S. sales to Russia by 98 percent. Poultry meat accounted for about 55 percent of all

U.S. agricultural exports to Russia in 1995, making the HVP share of exports to Russia one of the highest of our export markets. Hong Kong was the second leading market at \$390 million, followed by Japan, \$177 million, and Canada, \$167 million.

Exports of vegetables and preparations rose 18 percent to a record \$4.1 billion. Exports to Canada and Japan, the two largest markets, each rose 27 percent to \$1.5 billion and \$759 million, respectively. Nearly half of the vegetables shipped to Canada were fresh, and fresh vegetable exports rose 19 percent to \$747 million, although volume was lower. Higher U.S. fresh vegetable prices boosted export value. A majority of vegetable exports to Japan were frozen or highly processed vegetable products. Frozen vegetables rose 16 percent to \$193 million and highly processed vegetables rose 34 percent to \$278 million.

There were also substantial gains in intermediate HVP products such as vegetable oils, hides and skins, and animal feeds, three of the largest groups of intermediate exports. Vegetable oil exports, led by soybean oil, rose 59 percent to \$1.9 billion. Soybean oil exports jumped 87 percent to \$809 million. Strong demand for edible oils in China boosted U.S. shipments to China to 551,000 tons, from 82,000 tons the previous year. U.S. exports of hides and skins rose 21 percent to \$1.7 billion. Most of the gains were to the East Asian markets of Japan, Hong Kong, South Korea, and Taiwan. Animal feeds and fodder exports gained 12 percent to \$2.5 billion. Feed and fodder exports to the EU-15 rose 18 percent to \$1.1 billion, accounting for much of the gain. (*Joel Greene, Trade Analysis Branch, 202-219-0816*)

Final Fiscal 1995 Imports Set Record at \$29.5 Billion

U.S. agricultural imports reached \$29.5 billion in fiscal 1995, 12 percent above fiscal 1994's \$26.4 billion. A few commodities lagged, but most commodities advanced. Coffee, rubber, vegetable oils, live animals, and horticultural products contributed to the record import value. Declines were concentrated in relatively few commodities such as beef, tobacco, seeds, grains, and oilseeds.

Coffee accounted for \$1.3 billion of the \$3.2 billion increase in total imports. Frosts in Brazil, the major producing country, drove world coffee prices up early in fiscal 1995, as supply shortfalls were anticipated. Import unit values almost doubled to \$4,000 per ton. Later in the year, world prices declined but nevertheless remained at high levels compared with the previous year. With exports from Brazil down, Mexico became the leading supplier to the United States for much of the year. However in September, Brazil nudged Mexico out of first place by a margin of only 4,000 tons. Weather was not the only factor affecting coffee imports. The 4-percent decline also resulted from long term decreases in U.S. consumption, and roasters are operating with lower stocks of raw beans relative to consumption due to more efficient delivery systems.

U.S. rubber import value surged in fiscal 1995, rising to \$1.5 billion, almost double fiscal 1994's total value. Production shortages in Malaysia in 1994 and high world demand caused by economic expansion, especially in the Pacific Rim, tightened the world rubber market and raised prices.

Vegetable imports rose \$390 million to \$3 billion in fiscal 1995, 15 percent above the previous year. Overall, fresh and frozen vegetable imports were \$1.6 billion. Tomato import value gained 24 percent, reaching over \$400 million; volume gained 39 percent to nearly 160,000 tons. Mexico shipped nearly all the fresh tomatoes imported by the United States. Mexican vegetable shipments expanded because of the peso devaluation in December 1995 as Mexican products became relatively cheaper for U.S. buyers.

Peppers rose 32 percent in value, reaching nearly \$245 million, of which \$180 million were from Mexico. The Netherlands provided most of the remainder. Canned mushroom imports, another high-growth vegetable, advanced 26 percent in fiscal 1995, with China and Indonesia the

predominant sources. Canned mushroom imports were valued at \$167 million. Onions, cauliflower and broccoli, potatoes, cucumbers, and olives were also major vegetables imported.

Meat imports declined 14 percent to \$2.3 billion in fiscal 1995. Beef accounted for \$1.5 billion of the total, and pork \$700 million. Low beef prices in the United States, drought in Australia, and packing plant renovations in Canada, contributed to lower import value.

At \$2.3 billion, grain and feed import value was slightly less than fiscal 1994. Quantity was down 26 percent as import unit values surged. World grain prices rose due to shortfalls in barley production in Canada, and the Australian drought. Oats, wheat, and barley were the major grains imported, and Canada was the major supplier.

Tight world supplies of vegetable oils and resulting high prices boosted import value 27 percent to \$1.4 billion, even though volume was down slightly. Coconut oil from the Philippines and rapeseed oil from Canada each accounted for almost \$500 million in imports. Globally, vegetable oil prices have risen due to strong demand caused by increased consumption. Large Chinese imports exacerbated the already tight world market.

Wine and beer imports totaled \$2.3 billion in fiscal 1995, almost evenly split between the two. The Netherlands was the leading supplier of beer to the United States with over 3.6 million hectoliters and \$400 million. Canada shipped nearly the same volume but with unit values nearly half the Netherlands at \$190 million. Mexico was the third leading supplier with shipments of 2.7 million hectoliters valued at \$220 million.

Total wine imports were \$1.1 billion, slightly higher than fiscal 1994. France, the leading source by value, shipped half the wine imported. On a volume basis, however, France accounts for only 26 percent due to the high unit value of its shipments. On the other hand, Italy ships nearly twice the volume as France but with much lower unit values, so Italy's import value was only \$300 million. Chile, Spain, and Australia were also major wine suppliers.

Fiscal 1995 fruit imports, including bananas and juices, totaled \$3.4 billion, up about 6 percent from fiscal 1994. Mexico was the leading supplier, followed by Costa Rica (primarily bananas), and Chile. At \$1.1 billion, fresh and frozen fruit gained

16 percent in value over fiscal 1994, surpassing \$1 billion for the first time. Mexico, the largest source of fresh and frozen fruits, shipped over 700,000 tons valued at \$400 million. Mangos, melons, grapes, and strawberries were the major fruits imported from Mexico. Chile followed Mexico with shipments of grapes, peaches, and pears. Fruit juice imports declined in value due to lower apple and orange juice shipments, as production in the United States was strong. Banana volume and value were steady.

Cocoa import value remained steady on declining volume. Low production in some South American and Asian countries resulted in world price increases. Canada and the European Union (EU-15) were major sources for products derived from cocoa beans, and the Ivory Coast, Brazil, and Indonesia were major sources for cocoa beans.

With value at \$5.7 billion in fiscal 1995, the EU-15 was the largest source of agricultural imports for the United States. EU-15 value gained 12 percent over fiscal 1994. In value terms, wine, beer, cheese, olive oil, casein, and pork were the major commodities shipped.

Canada followed as the second most important source for agricultural imports, with steady value of \$5.4 billion. Cattle were the largest single commodity, valued at \$850 million. Pork, beef, rapeseed oil, and biscuits were all major import commodities, with import values exceeding \$250 million.

Imports from Mexico, boosted by NAFTA and the devaluation of the peso, jumped 33 percent in fiscal 1995, reaching \$3.7 billion. Horticultural products, coffee, and live animals contributed to the surge.

Indonesia, Brazil, and Colombia were also major suppliers of agricultural commodities to the United States, with shipments of \$1.4 billion, \$1.3 billion, and \$1.1 billion, respectively. Included in the EU-15 total, but also shipping more than \$1 billion, were the Netherlands (\$1.1 billion) and Italy (\$1 billion). *(Tom Capehart, Trade Analysis Branch, 202-219-1262)*

3/ No. 1, ribbed smoked sheets.

You need the International Agriculture and Trade Reports to:

- understand what spurred China's imports of cotton and soybean oil
- see if you should bank on continued Russian wheat imports
- find out how the peso crisis affects U.S. agricultural exports
- get a handle on U.S. agricultural trade with Europe
- discover new markets for high-value products in the former Soviet Union
- learn what factors will affect future trade within NAFTA
- decide if you should count on corn exports to China
- determine where EU agricultural production and trade are headed

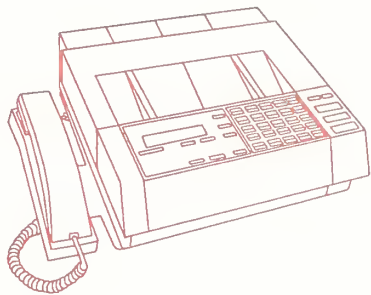

This four-report series includes *China*, *Europe*, *Former USSR*, and *NAFTA*. USDA economists draw on original foreign source materials to explain how basic forces are changing agriculture and agricultural trade around the world. Each report anticipates short- and long-term production, consumption, and trade of the region's key commodities. Detailed analysis backs up forecasts on how agricultural policies and structure, as well as macroeconomic and trade policies, will affect world food and fiber markets. Each report includes consistent, up-to-date data bases on key agriculture and trade indicators.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD). To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.
